

Aldermere Materials Group

Annual Report and Accounts 2025

For the year ended 31 December 2025

Fictional sample document. Created by Veridion for demonstration and testing. The company, people, sites and figures are invented and do not describe any real organization.

Chair's statement

2025 was a year of steady progress for Aldermere. Despite subdued housing starts, revenue grew by 3.6% as demand for precast concrete products remained resilient. We continued to invest in our plants, and we remain committed to reaching net zero across our operations by 2050.

The Board welcomed two new independent non-executive directors during the year, strengthening our expertise in energy markets and digital operations.

Financial review

Revenue for the year ended 31 December 2025 was £412.6 million (2024: £398.1 million). Operating profit increased to £38.9 million (2024: £35.2 million), reflecting improved plant utilisation and lower energy costs in the second half.

Financial highlights (£ million)

Measure	2025	2024
Revenue	412.6	398.1
Operating profit	38.9	35.2
Capital expenditure	27.4	22.8

Principal risks

Energy and carbon costs. Natural gas and carbon allowance prices remain volatile. We hedge part of our gas requirement up to 18 months ahead and continue to invest in kiln efficiency.

Climate-related physical risk. Two plants are located near rivers with increasing flood risk. Flood defences at one site were upgraded in 2025.

Regulatory change. Sustainability reporting requirements continue to evolve, and customers increasingly request product-level carbon data.

Environmental performance

The company monitors operational energy consumption across its manufacturing facilities.

In 2025 the Group's total energy consumption was 1,484,280 GJ (2024: 1,554,500 GJ).

Scope 1 emissions were 48,210 tCO₂e and location-based Scope 2 emissions were 21,940 tCO₂e in 2025. Streamlined Energy and Carbon Reporting disclosures are included in the Sustainability Report.

Corporate governance

The Board comprises a non-executive Chair, two executive directors and five independent non-executive directors. The Sustainability Committee, chaired by an independent non-executive director, oversees climate strategy, health and safety, and environmental performance.

The Audit and Risk Committee reviews the integrity of financial and non-financial reporting, including the processes used to collect environmental data.
